REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a magnetic random access memory device (MRAM). The independent claims 1 and 13 recite a MRAM cell having a wiring which extends in a first direction and is used to make an electric current flow to generate a magnetic field to be applied to said magnetoresistance element, wherein said wiring is formed so as to pass through a first position which is **closer to said substrate than** said magnetoresistance element and **does not overlap** said magnetoresistance element when viewed from a direction perpendicular to a main surface of said substrate, and a second position being **above** said magnetoresistance element. The PRIOR ART fails to disclose or suggest a MRAM cell having such a wiring as disclosed above to increase the magnetic field, therefore, claims 1-13 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel the non-elected claims 14-29.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571) 272-1871. The examiner can normally be reached on M-F (7:00-3:30).
